

STEEL DENTPULLING MACHINE

Réf.018082

GYSPOT 3504

New generation dent puller, ideal for all type of steel dent pulling and straightening work.

Controlled by a microprocessor (with 75 pre-settings), the Gyspot 3504 enables a large versatility and simplifies the task of the operator.

ASSETS

Only 2 parameters to select

- The power level (among 9 levels)
- The tool (among 7 tools)

=> No need to set the time and intensity parameters.

Automatic starting system

The welding point is automatically generated by a simple contact between the tool and the metal piece that must be dent pulled.

MADE in FRANCE
